

Metronics, Inc.

Still doing business like it's the '80s... until now.

Presented by
Mercury Springberry, Amanda D'Argenio,
and Jordan Kelly

What does Metronics do?

They fix the heavy equipment that automotive shops rely on to repair your vehicles.

this is Bob →

What problems are we trying to solve?

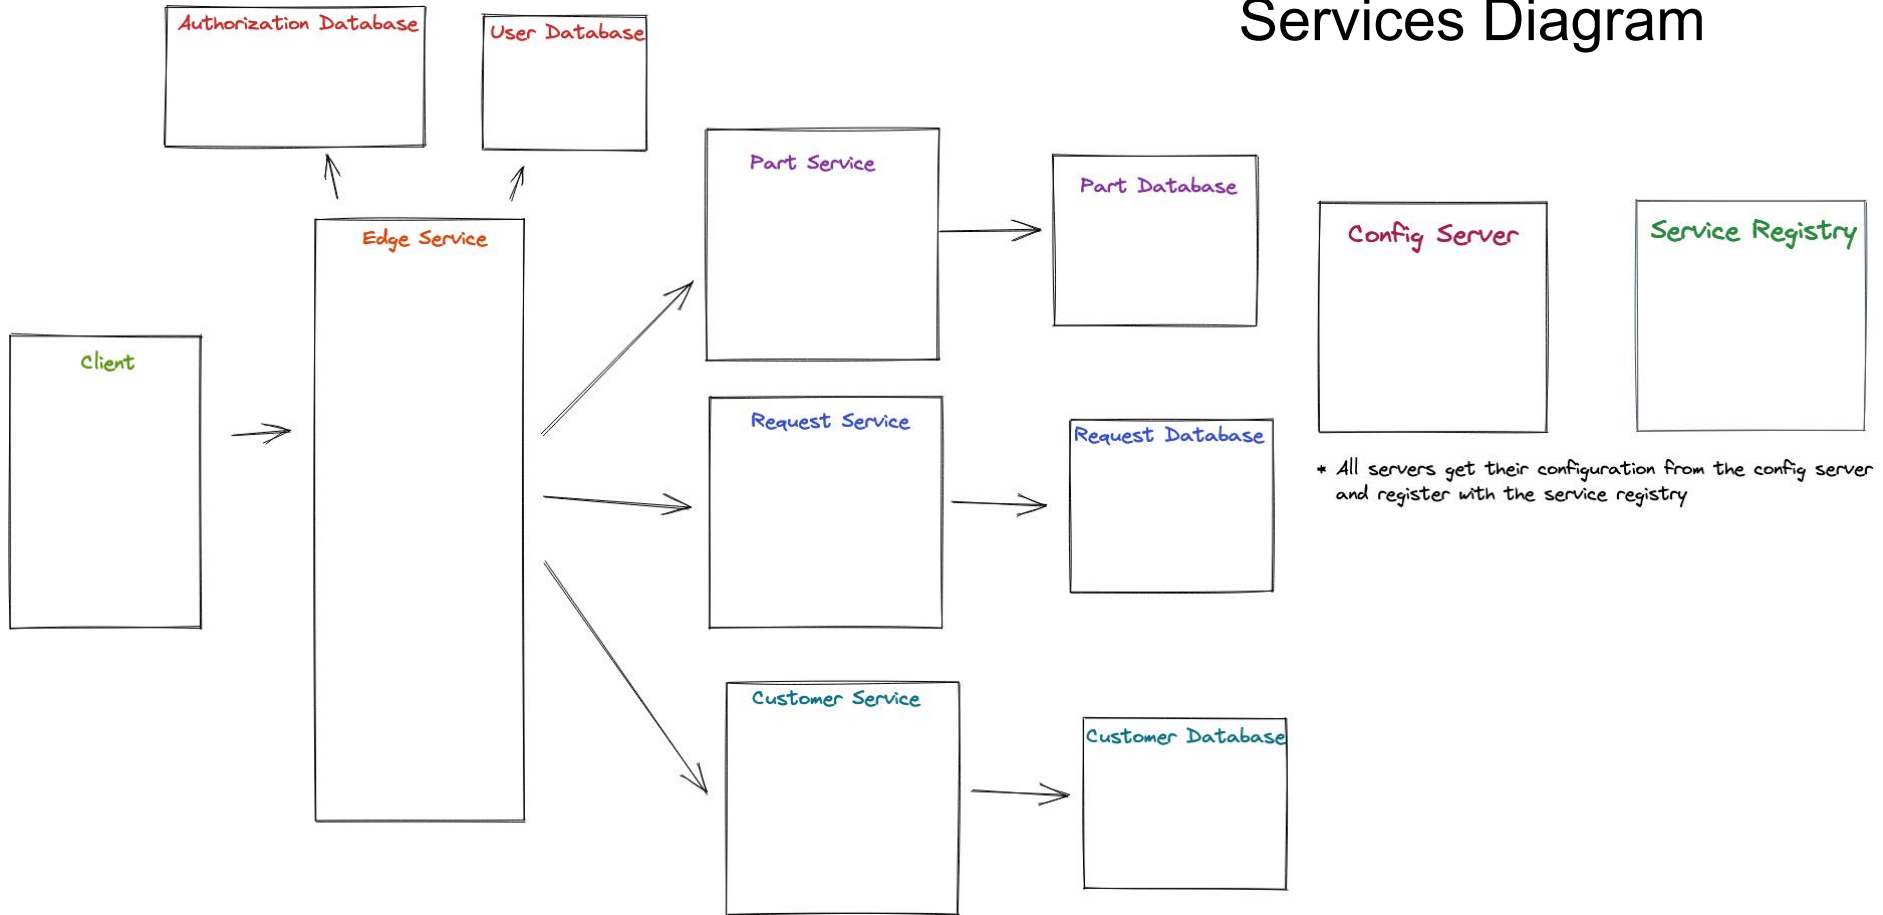

Have we been to this customer's shop before?

If so, what problem did we fix when we were there?

What parts do we have in inventory?

Services Diagram

Future Developments

- Include restricted routes in user authentication
- Design a customer portal
- Implement error handling and integration testing

Any Questions?

Thank you for watching this presentation by
Mercury Springberry, Amanda D'Argenio,
and Jordan Kelly

Just a few thoughts on how we could structure our presentation. Feel free to make changes.

- 1 mins - [Jordan](#) - Intro to business and problems.
- 1 mins - [Mercury](#) - Application structure architecture - add in microservice chart
- 5 mins - Demo the app
 - Amanda: login/authentication => dashboard => customer page
 - Jordan: request page
 - Mercury: inventory page
- 1 mins - [Amanda](#) - If we had more time?
